In a report released Thursday, the Federal Reserve's Board of Governors urged Congress to address tax cuts that could benefit many individuals and businesses while still providing the money needed to boost the economy. A portion of the income tax cut could go toward boosting productivity and creating more jobs, the central bank pointed out.

The committee's chief economist, Esther George, argued that a temporary slowdown in the U.S. economy, including in manufacturing, may be just what Congress needs. "It remains a possibility that further fiscal changes, such as the one contemplated in the forthcoming tax reform proposal, could affect the underlying fiscal policies and the unemployment rate, since the U.S. labor market is likely to remain weak for some time to come," she wrote.. "[W]e believe that as a result of lower economic activity, lower tax revenue, and higher economic uncertainty, the long-run sustainability of fiscal policy and the budget balances is uncertain," said the report.. The report also warned that "tax cuts could undermine economic growth and job creation in the short term by increasing the likelihood of an unemployment cycle which might delay or otherwise impinge on economic recovery."..
