You can then follow the steps in this article to start up from it Use Startup Disk preferences When you use Startup Disk preferences to select a startup disk, your Mac starts up from that disk until you choose a different one.. Select your startup disk, then restart your Mac If you see a message that your security settings do not allow this Mac to use an external startup disk, check the External Boot setting in Startup Security Utility.. For example, if you install macOS on an internal or external drive, your Mac can recognize that drive as a startup disk.

External Hard Drive Not Showing Up Mac Os Hard Drive Not Showing Up Windows 10 External Hard Drive Not Showing Up Mac Os X External Hard Drive Is Not Showing On Mac Best Mac Compatible External Hard Drive Mar 03, 2017 If yours is not a retina then it is an easy fix, go find a hard drive or ssd on amazon, new egg or a local tech store (frys, best buy, etc).. By default, your Mac starts up from its built-in hard disk, but a startup disk can be any storage device that contains an operating system compatible with your Mac.. Use a phillips 00 screw driver to open the macbook, you may need a T6 screw driver to transfer the drive screw mounts to the new drive.. Choose Apple menu  > System Preferences, then click Startup Disk Click the lock and enter your administrator password.. Put the new drive in and start the mac using command option R to boot into internet recovery and go from there.
