Post navigation Sex Has A Prevalence And The Drug Addiction Drug abuse is a common problem in our society and more people are struggling to keep drugs out of their bodies. The drugs or drugs can be prescribed or abused or illegal. The majority of people abuse drugs even if it is for short period. People struggle to keep the drugs out of their body because of habit. There are various types of drugs such as drugs used in sexual drugs. The drugs which are taken with the intention of increasing sex drive or for other sexual reasons. It is believed that the people who take such drugs have great sex and increase their sex drive. However, these drugs contain chemicals and have a side effect. Some of the common drugs which are used for sexual purposes include Viagra, Ambien, and other. These are prescribed by doctors for patients with erectile dysfunction and other sexual problems. But these drugs have side effects. Ambien has potential to cause serious side effects like short term memory loss and drowsiness. Although the Ambien is prescribed by doctors, the people have side effects of short term memory loss. There are various studies that found out that people take Ambien, when they drive or when they are alone. There are reasons that the people take these drugs and drug addictions for the sex. What is sex? People use different words to describe the term sex or sex act. Sex has a social aspect and is a part of life. Different people want sex on different time and on different occasions. Sex is not just about intercourse. It is about physical expression and expression of love, desire, and affection. Sex is a natural part of life. There are different ways to express sex. Sex is not just about intercourse, but it is also about intimacy, love, affection, and emotional bonding. In sex, there is the ecstasy and pleasure. But, the pleasure is also associated with stress. The stress can be physical or mental. This is the reason why sex addicts have problems. In a study, it was found that out of a sample of 24,000 students in the USA, there are 90 percent of male students reported problems with sex. But the problem with women is less. They are more emotional and less verbal than men. There is a high prevalence of drug addiction among the people who are drug addicted and sex addicts. The amount of drugs use, is common for sex and drug addicts. There is a big difference in the amount 82157476af
